(2) Require that the line item's design and manufacture will conform to: (i) an identified revision of a top-level drawing; and/or (ii) an identified specification or revision thereof;

(9) Define what constitutes the start of the warranty period (e.g., delivery, acceptance, in-service date), the ending of the warranty (e.g., passing a test or demonstration, or operation without failure for a specified time period), and circumstances requiring an extension of warranty duration (e.g., extending the warranty period as a result of mass defect correction during warranty period);

(10) Identify what transportation costs will be paid by the contractor in conjunction with warranty coverage;

(11) Identify any conditions which will not be covered by the warranty, other than the exclusion of combat damage; and

(b) Any contract that contains a warranty clause must contain warranty implementation procedures, including warranty notification content and procedures, and identify the individuals responsible for implementation of warranty provisions. The contract may also permit the contractor's participation in investigation of system failures, providing that the contractor is reimbursed at established rates for fault isolation work, and that the Government receive credit for any payments where equipment failure is covered by warranty provisions.
